RF POWER MODULES

MITSUBISHI

All Mitsubishi Power Modules are extensively tested in Manufacture, & are supplied in static safe packaging.

Mini-Kits offers a limited number of Mitsubishi Powermodules for the 144 to 1200MHz bands. Due to Mitsubishi's minimum ordering quantities, & the cost of stocking these modules, Mini-Kits does not stock all module types. Current demand is for poweramplifiers for 144MHz & above.

Mitsubishi No Longer Manufacture the M Series Power Modules. These have been replaced with the New MOSFET RA types. There is currently no MOSFET replacement for the M67715 or M57735 modules. Refer to www.minikits.com.au/kits2.html for the current stock levels of modules.
